Hello there, I am Eko Setiawan, a lifelong learner who is highly passionate about Data Science and Backend Development. My recent activity is taking various Data Science courses and building some Data Science related projects, please consider visiting my personal blog to see my projects. I also studied Backend Development during college. I have an interest in working in the Data Science industry and becoming a proficient Data Scientist.

Work Experience

Virtual Data Scientist Intern

The Forage
April 2023 to June 2023

• Transformed thousands of passenger reviews into actionable insights by conducting sentiment analysis.
• Leveraged Topic Modeling techniques to proactively address passenger complaints and improve customer satisfaction.
• Drove revenue optimization by developing predictive models to forecast passenger booking completion, resulting in improved conversion rates.

Assistant for Artificial Intelligence Technology Practicum

Gunadarma University - Jakarta
September 2021 to November 2021

• Serves as an assistant for Artificial Intelligence Technology Practicum Course, a mandatory course which contains practical Machine Learning projects for participants.
• Helps participants to solve their technical problems when accessing the course's website.
• Providing support to participants for resolving course-related questions and issues.

Education

Bachelor's degree in Information Systems

Gunadarma University - Indonesia
July 2019 to August 2023

Skills

• Data Science
• Machine Learning
• Regression Analysis
• Python

- Git
- AI
- MySQL
- TensorFlow
- Data Visualization
- Computer Science
- Go
- PyTorch
- Natural language processing
- Computer vision
- Pandas
- NumPy
